DeerHacks 2023

Pranav, Shelley, Shreyas, Vidhi

The average woman spends 17 minutes each morning deciding what to wear.

Problem Statement

Choosing the perfect outfit is a time-consuming task with many factors to consider, such as occasion, weather, and time of day.

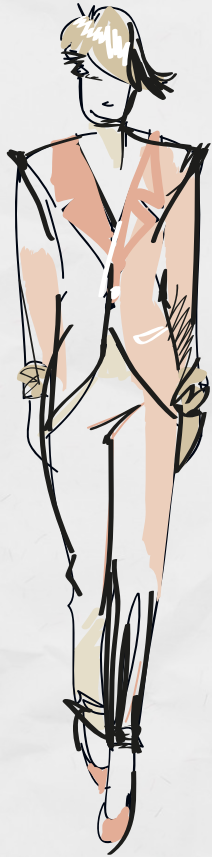

Our Solution...

Introducing innovogue!

A web application that uses machine learning algorithms to suggest personalized outfits based on the occasion and your wardrobe.

Key Features

- Wardrobe inventory database
- Outfit recommendation feature
- AI judging
